Referring a Patient to Watsu

Watsu® is Considered Massage

Since

Watsu® is a massage practice, physicians may refer to me as you would any other licensed massage practitioner. I am a licensed massage practitioner, a certified Watsu® practitioner, and a cranial sacral therapist.

I have had great results with people suffering from

- chronic pain and distress—both physical and emotional, and
- for chronic fatigue.

Doctors have also referred patients to me for

- fibromyalgia,
- soft tissue injury related to auto accidents or work related injuries,
- stress related disorders,
- depression,
- anxiety,
- insomnia,
- chronic headaches, and
- trauma.

Watsu® is also very effective in treating those suffering from

- arthritis,
- post polio, and
- overall stiffness both injury and age related.

Please contact me to discuss the specifics of any particular case.
